News for Vocational Qualification and Guidance Practitioners & Representatives of Politics and Science

European projects dealing with vocational qualification often rightly refer to a high number of actual realisations and good practice in the thematic area of Gender Mainstreaming.

It is, however, not always easy to inquire into specific information, methods employed in individual projects, their status and relevance within the framework of the project.

**GenderNet** tries to facilitate **access to Gender approaches and methods** for responsible persons from the educational sector, relevant organizations, institutions, enterprises and individuals interested in the subject and would like to improve the availability of "Best Practice".

**GenderNet** addresses vocational qualification and guidance practitioners, as well as representatives of labour market policy and science.

## GenderNet offers

- › **information, elements of experience, ideas, stimuli, solutions**
- › **exchange among experts on a European level**
- › **a comprehensive database for concrete research into Gender-oriented projects dealing with education (for free)**
- › **a survey of Gender policy, tools, methods and approaches**

- › **a platform for relevant publications**
